

When Health Matters

Mixing Instructions for our **23 and 43 day IM Kits**

23 day protocol mixing instructions

Mix 2-2000iu with 30cc of water for 30-125iu, 1 cc daily injections.

1. Remove the top off of the 2-2000iu HCG's,. **Throw out the sodium chloride**
2. Using the large syringe, attach the mixing needle.
3. To help get the water into the empty glass vial, let's remove some air first.
4. Insert mixing needle into the glass vial, and pull open to 10 the full needle.
5. Remove the needle from the glass vial and close the needle.
6. Now remove 2cc of water, mix it with the hCG and move it to the glass vial.
7. You do this by inserting the needle into the Water, withdrawing 2cc's, then insert the needle into the hCG and fill. Use needle to help mix.
8. Withdraw the 2cc of water/hCG mixture and insert it into the Glass Vial.
9. Repeat step 7 with both amps of hCG to make sure you have all the HCG!
10. You should end up with all the water and hCG mixed in the glass vial.

Injecting!

On your injection needle you want to use 1cc per day for each injection.

KEEP MIXTURE REFRIGERATED!

43 day protocol mixing instructions

Mix 1-5000iu with 30cc of water for 40-125iu injection at .75cc each.

1. Remove the top off of the 5000iu HCG,. **Throw out the sodium chloride**
2. Using the large syringe, attach the mixing needle.
3. To help get the water into the empty glass vial, let's remove some air first.
4. Insert mixing needle into the glass vial, and pull open to 10 the full needle.
5. Remove the needle from the glass vial and close the needle, removing the air.
6. Now remove 2cc of water, mix it with the hCG and move it to the glass vial.
7. You do this by inserting the needle into the Water, withdrawing 2cc's, then insert the needle into the hCG and fill. Use needle to help mix.
8. Withdraw the 2cc of water/hCG mixture and insert it into the Glass Vial.
9. Repeat step 7 to make sure you have all the HCG!
10. You should end up with all the water, and hCG mixed in the glass vial.

Injecting.

On your injection needle you want to use .75cc per day for each injection.
